DATACOMM ELECTRONICS™

Expandable Media Box
45-0051-WH, 45-0061-WH, 45-0052-WH

DataComm Electronics' Expandable Media Box is designed to streamline power and cable management behind your HDTV. The expandable portion of the Media Box allows for maximum storage hidden behind your TV, while still allowing your TV to mounts to the wall.

Features

Part # 45-0051-WH | ETL US Only
- Low profile design - fits behind thinnest TVs and mounts
- In-wall storage capacity increases by 75% when the expandable portion is extended into the wall.
- There are two openings inside of the Recessed Media Box, one on the top and one on the bottom. Three (3) interchangeable plates are included to cover these openings, allowing for multiple configuration options. The three (3) plates include:
  - › Flexible Opening Plate
  - › 6-Port Keystone Plate
  - › Blank Plate
- UL Listed,15 Amp/125 Volt Duplex Receptacle
- Outlet box included
- Metal mounting wings are attached to the media plate and fasten tightly against the back of the drywall when installed
- Quick and easy to install

Part Number	Description
45-0051-WH	w/ 15 Amp/125 Volt Duplex Receptacle
45-0061-WH	w/ 15 Amp/125 Volt Surge Suppressor
45-0052-WH	w/ 20 Amp/125 Volt Duplex Receptacle

Part # 45-0061-WH | Surge Suppressor Features | ETL US Only
UL Listed 15 Amp/125 Volt Duplex Surge Receptacle:
- Maximum surge current - 15,000 amps
- Clamping response time - 1 nanosecond
- Hot/Neutral, Hot/Ground, Neutral/Ground
- Total maximum surge dissipation - 480 joules

Part # 45-0052-WH | 20 Amp Model w/ Steel Outlet Box Features ETL US & CAN
UL Listed 20 Amp/125 Volt Duplex Receptacle:
- 2 pole
- 3W
- Rear connection with side screw terminals
- Tamper resistant

Keyo™

Wall or Surface mountable, Keyo™ provides a highly versatile tablet mounting platform. Formed aluminum, riveted for added structural integrity creates a slimline enclosure with ample room behind the tablet for peripherals and add-ons. Multi-tablet capable and designed to provide unequal adaptability, Keyo offers you unparalleled choice for tablet deployments.x

Features & Benefits
- Limited Lifetime Warranty
- Formed aluminum enclosure, riveted for increased strength
- Multi-tablet capability using a new Tablet Fit Kit™ system
- Easy-open front access with secure key lock
- Ample room inside for cables and peripherals
- Mount over electrical 'wall plate option'
- Interchangeable side panels to easily add peripherals
- Available in 3 standard sizes and colours
- Wall or Surface mountable
- Landscape format standard *(ask about portrait availability)*

Perfectly suited for point of sale integrations

Ample room for cables and peripherals

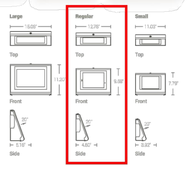

1. Detachable front panel provides easy access to the tablet and only integrated peripherals
2. Lower rear covering provides mounting and cable options*
3. Changeable side panels makes adding peripherals easier

Available in three sizes

Specifications

Small			
Height:	7.79" (198 mm)	Depth:	3.92" (100 mm)
Width:	11.00" (280 mm)	Weight:	2.50 lbs (1.13 kg)
Regular			
Height:	9.68" (246 mm)	Depth:	4.60" (117 mm)
Width:	12.78" (325 mm)	Weight:	3.46 lbs (1.56 kg)
Large			
Height:	11.20" (284 mm)	Depth:	5.16" (131 mm)
Width:	15.03" (382 mm)	Weight:	4.59 lbs (2.08 kg)

Tablet-friendly
The only tablet enclosures in the world to offer true multi-tablet support

Lifetime Warranty
We offer a Limited Lifetime Warranty on all of our tablet enclosures and stands

Tough & Secure
The toughest and most secure tablet stands and enclosures available

Award winning
Our award-winning tablet enclosures and stands have been recognised in various industries

Made in NA
All Armodilo products are 100% designed and manufactured in North America

Decora Outlet Overlay

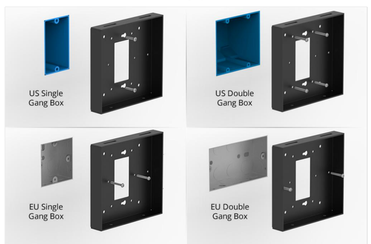

Want to use an already existing electrical outlet to power a tablet? Our 15° Fixed Tilted Wall Mount can be installed over the top of a decora style or GFCI outlet - taking the place of the faceplate. Simply remove the face plate and loosen the screws for the outlet. Then use the keyhole design pattern on the wall plate of the mount to fit over the outlet. Next tighten the screws for a clean finish and polished installation.

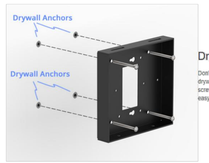

No Wall Cutout Required - Retrofit / Gangbox Friendly

What would you rather do: Make a huge rectangular cutout? Or, mount onto an existing gangbox in your wall / drill in (4) screws? (We are guessing the latter!) Luckily, that's all we'll need to do to install the 15° Fixed Tilted Wall Mount.

The wall plate allows for numerous mounting options. There are mounting and screw patterns for the single and double gang EU electrical / back boxes. As well as patterns for the North American equivalents - the US single and double gang boxes. This mount can easily adapt to whichever electrical box is already installed - making retrofitting easy!

Drywall Mounting

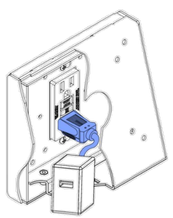

Don't have a gang box to mount to? No problem - mounting directly onto drywall is simple. The 15° Fixed Tilted Wall Mount is kitted with wood screws and drywall anchors to accomplish this task - mounting made easy!

Wire Management

Need to fit a plugged in tablet's AC adapter / "power brick" within a kiosk? Boxing and hiding powering components of the tablet is easy with our 15° Fixed Tilted Wall Mount. There is more than enough to plug the tablet's powering components into an overlaid outlet - if additional room is need, use the included 1ft extension cable for a better wiring configuration. Also PoE and other adapters can be kept out of site inside this mounts roomy storage chamber.

With through holes on both the wall and VESA plates in its design, we can easily pass cables from our mounted VESA ready device. No need to make additional cut outs or punch additional holes when using our VidaMount enclosures!

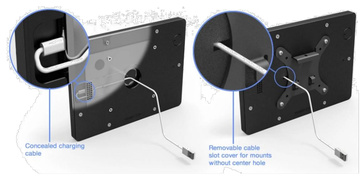

Includes Easy-to-Use Extension Cable

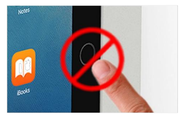

We have included a small extension cable with this mount. The extension cable makes it easier for the AC adapter of some tablets to fit into the mounting chamber. Easier fitting power components leads to a hassle free and smooth installation.

Learn more about tips for fitting power components into the fixed tilted surface mount here.

Cable Management

We thought of everything, from fitting your Lightning or USB power cables, to a perfectly sized opening for your 3.6mm headphone jack and cord (including some add-on credit card readers). Our enclosure was designed to fit your needs.

Camera / Home Button Covered OR Exposed

"To cover, or not to cover?" that is the question. If you are running an application which is best left alone, consider selecting the Camera / no Button Covered model to keep pushy fingers away from the iPad home button and your application.

Power Button Access

Our unique enclosure design provides a choice between open or limited power button access. As shipped, the enclosure covers the power button – removing the ability for a user's finger to access the tablet's power button. A tiny thin hole still provides the ability to actuate the power button using a paper clip or other tool. Alternatively - for free, unfettered power button access, the cover is removable as needed!

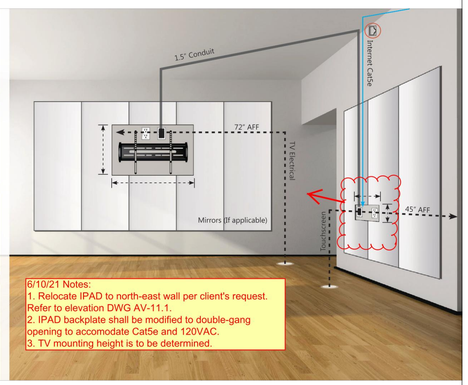

PREPARE THE ROOM

Electrical
iPad duplex outlet
45" above finished floor
TV: duplex outlet 72"
above finished floor

Conduit
1.5" conduit is a requirement for the WELLBEATS system. This allows for WELLBEATS to install the low voltage cables at the time of installation.

Hardwired Internet Line
The WELLBEATS Interactive iPad requires an active, hardwired internet connection at the time of installation.

Mirrors (If applicable)
iPad location: 10"H x 15"W
TV location: 24"H x 34"W
It is critical to follow the cutout measurements in the picture or speak to your project manager.

6/10/21 Notes:
1. Relocate IPAD to north-east wall per client's request. Refer to elevation DWG AV-11.1.
2. IPAD backplate shall be modified to double-gang opening to accomodate Cat5e and 120VAC.
3. TV mounting height is to be determined.
